## A Message from the General Manager

### Summer of Adventure

Television has three traditional programming seasons – Fall, Winter and Summer. Summers used to be mostly repeats from the other seasons – but not anymore! Thanks to member donations, Vegas PBS will present exciting new series throughout the summer that will take you to some of the world's most amazing places and cultures. We are striving to present a true "summer of adventure" to give you some of the most creative, inspiring and educational programming of any season.

This summer's lineup of history, science and natural history programming kicks off with **The Story of China** on Tuesdays, beginning June 20. Historian and host Michael Wood surveys the 4,000-year history of the world's oldest continuous state to help viewers better understand this global superpower today.

The following night, viewers will plunge into the Pacific with the premiere of **Big Pacific** on Wednesday, June 21. Researchers and cinematographers expose the ocean's rare and dazzling creatures and explore an ocean that covers a third of the Earth's surface. Immediately following **Big Pacific**, viewers can regain their footing on the dramatic landscape of Yellowstone Park. The Smithsonian Institution's Kirk Johnson explores the dramatic seasonal changes that affect the park's wildlife on the **Great Yellowstone Thaw**.

PBS dubs Wednesday nights the "Smartest Night on Television" with its compelling lineup of science and nature programming. Vegas PBS opens the night with our popular local adventure program, **Outdoor Nevada**. New episodes air Wednesdays at 7:30 p.m. (with rebroadcasts Saturdays at 3 p.m. and Sundays at 8:30 a.m.) and explore the varied environments across our state that provide endless inspiration for exciting outdoor adventures.

Audiences for news are increasing and Vegas PBS is increasing our coverage of national and international news with **PBS NewsHour Weekend**. Based on viewer requests, we are adding the 30-minute broadcast to our weekend schedule on Saturdays and Sundays at 6 p.m. beginning June 17. Like the weekday edition, **PBS NewsHour Weekend** provides original, in-depth field reporting and perspective on topics including education, healthcare, the economy, energy, science and technology, religion, finance and the arts. This allows Vegas PBS to expand critical news coverage on Channel 10 to seven days a week.

As the school year comes to an end and children begin their summer adventures, they can enjoy an all-new lineup of PBS KIDS daytime programming. With older siblings at home all day, we are seeking to serve a broader range of preschool and elementary school children. The new schedule begins Monday, June 5 on Channel 10. See page 23 for a detailed program listing.

Many of our members continue their on-screen adventures with in-person travel experiences like our popular summer trips to the Utah Shakespeare Festival or the Tuacahn Amphitheater to enjoy live performances in a beautiful outdoor setting. Please visit [VegasPBS.org/specials](http://VegasPBS.org/specials) for a complete list of unique Vegas PBS travel adventures. Thank you for your support of this exceptional programming!

## The Story of China

**Tuesdays at 8 p.m. beginning June 20**

The summer kicks off with an unprecedented, six-part series exploring the 4,000-year history of China, home to more than a billion people and an emerging global superpower. Host and historian Michael Wood suggests that to understand China today we must examine its past.

Wood takes you on an amazing journey deep into China's breathtaking landscapes to find the people and stories that have helped

create China's distinctive character and genius for more than four millennia. Wood treks through the deserts of the Silk Road, visiting the ancient cities of Luoyang and Kaifeng, and to the modern metropolises of Beijing and Shanghai. This is China as rarely seen.

From the First Emperor to the Mongols and from the Opium Wars to the Communist Revolution, Wood paints vivid pictures of some of the great characters of Chinese history, not just emperors, but scientists, poets, rebels and novelists as well. Viewers meet the intrepid Buddhist traveler Xuanzang, the

great woman poet Li Qingzhao, and Su Song — China's Leonardo da Vinci. Wood captures the essence of key dynasties of China — from its first empire, the Shang, dating from 1500 B.C., through its last, the Qing, ruling from 1644 to 1911. The series concludes with the great rebellions of the 19th century that led to the rise of Mao Zedong and shows viewers the living culture of China today, from intimate family celebrations to vast communal rituals in the Yellow River plain.

## Big Pacific

**Wednesdays at 8 p.m. beginning June 21**

As the Earth spins, there's a point where all we can see is the Pacific Ocean: it holds half of our world's water, and hides the deepest place on our planet. 75 percent of Earth's volcanoes surround the Pacific, even though it stretches from Pole to Pole. It's greater than all Earth's land combined, and home to beasts beyond our dreams — and our nightmares. In this groundbreaking series, the world's best cinematographers and researchers will capture its most guarded secrets to share with viewers everywhere.

## Great Yellowstone Thaw

**Wednesday at 9 p.m. beginning June 21**

Journey with Kirk Johnson to Yellowstone, where wolves, grizzlies, beavers and Great Gray owls survive one of the greatest seasonal changes on the planet. As the temperature swings 140 degrees, cameras capture how the animals cope. Part 1 follows the dramatic ups and downs in Yellowstone as the wildlife families brave a brutal winter, then face the drama of the great thaw as spring arrives. Will the harsh winter weather favor predator or prey? Can the grizzlies that emerge early survive? In part 2, spring brings new life and a break from the brutal winter temperatures. But the dangers aren't over. Wildlife families face a torrent of water cascading down the mountains as the great thaw gets underway. Then in part 3, a summer with soaring temperatures could pose a threat to Yellowstone's ecosystem. Learn if the Great Gray owl family survives a major fire in the Beartooth Mountains and see how one particular wolf pack is feeding its 11 pups.

## 10 Parks that Changed America

**Monday, June 19 at 10 p.m.**

This special highlights visionaries who transformed open canvases of land into serene spaces that offer city-dwellers a respite from the hustle and bustle of urban life. While European cities were traditionally defined by their private squares and royal hunting grounds, American cities were often built around these democratic, public spaces.

From the elegant squares of Savannah, Georgia, to a park built over a freeway in Seattle, to the more recent High Line in New York, each story introduces us to the heroes who brought these parks to life. Featuring landscape architects and historians, the program uncovers the evolution of our nation's city parks and the history of landscape architecture — an art form in which human beings try their best to mimic nature.

## 10 Towns that Changed America

**Monday, June 26 at 10 p.m.**

Visit ten influential planned towns that transformed our ideas of community. Most cities, towns, and suburbs have evolved organically over time — their design resulting from the disparate actions of individuals. But these ten experimental towns were designed (or redesigned) from the ground up by visionary planners, and ordinary citizens who sought to change the lives of residents using architecture, design and urban planning. Some of these planners were driven by ideology, others were trying to serve their own financial interests, but all had one thing in common: they believed in the power of our built environment to change the way we live.

The program profiles ten towns that have had lasting impact on the way our cities and suburbs are designed. From forward-looking towns such as Greenbelt, Maryland, to Seaside, Florida, a town that tries to recapture the past, or a radical suburb (Riverside, Illinois) to a city with divine inspiration (Salt Lake City, Utah), this special is an eye-opening look at the evolution of some of the places we call home.

## Outdoor Nevada

**Wednesdays at 7:30 p.m.**

Grab your travel gear and join host John Burke as he crisscrosses the state on the ultimate road trip. Nevada's ideal climate and varied environments provide endless inspiration for our exciting outdoor adventures. Whether we're horseback riding in Red Rock Canyon, riding on a seaplane at Lake Tahoe or land sailing outside of Las Vegas, we're having a blast. John takes us on experiences ranging from the extreme to the serene and everything in-between. Tag along as we meet with locals who share their stories and experts who convey valuable information related to natural history and science.

## Life on the Reef

**Thursdays at 8 p.m. starting June 15**

This stunning three-part series examines the array of life in and around one of the planet's most extraordinary and endangered places, Australia's Great Barrier Reef, and the efforts to protect it. Amid the fringing reefs, coral cays and islands of the Torres Strait, the human residents living on the Great Barrier Reef seek to find the critical balance between their needs and those of a diminishing natural world. Set against a

backdrop of extraordinary marine habitats, the series takes you above and beneath the waters to see how nature adapts to the changing seasons throughout the year.

## The Buddha

**Tuesday, June 13 at 8 p.m.**

Two-and-a-half millennia ago, a new religion was born in northern India, generated from the ideas of a single man, the Buddha, a mysterious Indian sage who famously gained enlightenment while he sat under a large, shapely fig tree. The Buddha never claimed to be God or his emissary on earth. He said only that he was a human being who, in a world of unavoidable pain and suffering, had found a kind of serenity that others could find, too. This documentary tells the story of his life, a journey especial-

## WWII Mega Weapons: The Tunnels of Okinawa

**Thursday, June 15 at 10 p.m.**

The tide of war in the Pacific has now fully turned against the Imperial Japanese forces. In a fierce and brutal island hopping campaign, the Americans are winning battle after battle, rapidly gaining ground in their ultimate goal of invading mainland Japan. However, the Japanese decide that the island of Okinawa will be their last bastion of defense.

## NOVA: Making North America: Origins

**Wednesday, June 21 at 10 p.m.**

This unprecedented, three-part series presents a bold and sweeping biography of our homeland. How was it built? How did life evolve? How did the landscape shape us? Host Kirk Johnson embarks on an epic road trip to uncover the clues just beneath our feet. In this week's episode, see the epic 3-billion-year story of how our continent came to be. From palm trees that once

flourished in Alaska to huge eruptions that nearly tore the Midwest in two, discover how forces of almost unimaginable power gave birth to North America. **Repeats Sunday, June 25 at 10 a.m.**

## Nazi Mega Weapons: Hitler's Island Mega Fortress

**Thursday, June 22 at 10 p.m.**

After Hitler's invasion of the British Channel Islands in 1940, he orders them to be made into an impregnable fortress to repel Allied attack. Some of the greatest and most mysterious structures of the entire Third Reich still remain there. *Please see page 29 for details.*

## Nazi Mega Weapons: Hitler's Killer Subs

**Thursday, June 29 at 10 p.m.**

This is the story of the world's first true submarine, the boat that perhaps could have won the war in the Atlantic for the Germans had it been in the water maybe two years earlier. They were the first submarines designed to operate primarily submerged, rather than spending most of their time as surface ships that could submerge for brief periods when in danger. Their speed, the ability to stay submerged for days and unrivaled fire power made the Type 21 U-boat Hitler's ultimate deep sea destroyer.

# Rudy Maxa's World

**Sundays at 8 a.m. beginning June 18**

Award-winning travel journalist and host Rudy Maxa embarks on another round of wide-ranging adventures in the third season of the Emmy®-winning series. This season, six lively, informative and beautifully photographed episodes follow Maxa from lush, tropical Tahiti to the charming fishing towns of Nova Scotia. In each location, Maxa offers his sophisticated take on the history, architecture, culture, cuisine and people of some of the world's great destinations, making them accessible to active and armchair travelers alike.

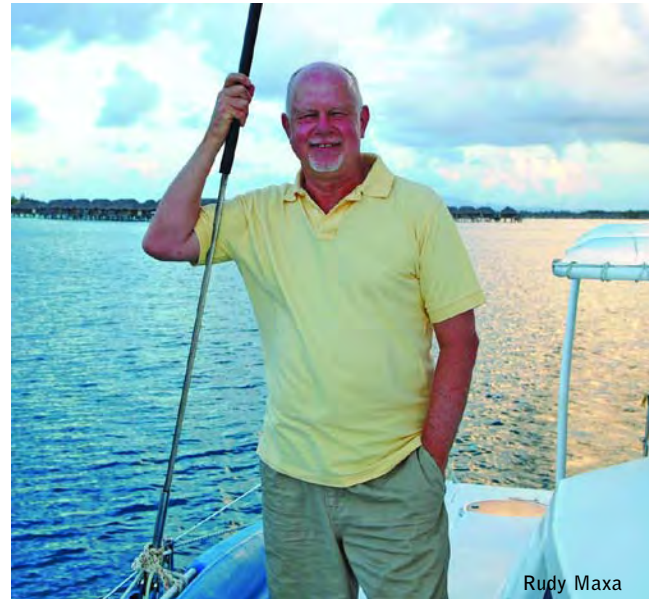

## THIS MONTH'S EPISODES INCLUDE:

### Tahiti & Bora Bora **June 18**

For sheer tropical splendor, the islands of Tahiti and Bora Bora stand alone. Hyper blue lagoons, white-sand beaches, fish of every shape, size and color, as well as a generous and welcoming people make these islands favorite destinations for travelers from around the world. Lush aerial photography is a highlight of this episode.

### The Islands of Polynesia **June 25**

French Polynesia's far-flung collection of about 130 islands range from lagoon-ringed islands with green volcanic spires to low, coral atolls with very little land, to heavily forested, rugged beauties. This is a place of dreams, a culturally rich, geologically fascinating group of islands surrounded by azure waters teeming with marine life, as lavish underwriter photography illustrates.

# JFK: The Lost Inaugural Gala

**Thursday, June 1 at 8 p.m.**

In celebration of John F. Kennedy's 100th birthday on May 29, 2017, this special opens a window into the glamour and excitement that descended on the nation's capital for his 1961 inauguration, with a never-before-seen musical event: the Pre-Inaugural Gala. It was a star-studded musical celebration videotaped for national broadcast with performances by Frank Sinatra, Ethel Merman, Harry Belafonte, Ella Fitzgerald, Nat King Cole, Gene Kelly and more. But a colossal blizzard knocked out power in DC, and those show-stopping performances remained in the vaults — until now. Along with these magical selections, the black-and-white gala performances are enhanced and interconnected by brilliant color and black-and-white footage from the Kennedy years. *Repeats Sunday, June 4 at 3:30 p.m.*

**Throughout the Month**

## **A Place to Call Home**

**Sundays at 6:30 p.m.  
(returning June 18)**

This sweeping romantic drama centers on enigmatic nurse Sarah Adams (Marta Dusseldorp) as she returns to her native Australia after two decades in Europe. Estranged from her mother and carrying the secrets of her wartime experiences, Adams becomes involved in the lives of the Blighs, a wealthy pastoralist family. When Sarah unwittingly discovers a potentially scandalous Bligh family secret, her future becomes forever linked with theirs.

## **My Mother and Other Strangers on Masterpiece**

**Sundays at 8 p.m. beginning June 18**

Hattie Morahan (*Sense and Sensibility*) stars as Englishwoman Rose Coyne, raising her daughter Emma and son Francis in Northern Ireland during World War II. Owen McDonnell is her loving husband Michael, a

Northern Irishman who realizes he never lived up to her dreams. A chance meeting with Aaron Staton (*Mad Men*), village teacher and U.S. air force officer, leads to a friendship that blossoms into something deeper. Shot on the stunningly beautiful Ards Peninsula in Northern Ireland, the series portrays the culture clash when a U.S. bomber base is established near the fictional village of Moybeg in 1943, bringing hundreds of gum-chewing, swing-band-listening American airmen to a remote Ulster farming community, with its winsome women and stolid workingmen.

## **Grantchester, Season 3 on Masterpiece**

**Sundays at 9 p.m. beginning June 18**

Join James Norton and Robson Green as the improbable crime-fighting team—Reverend Sidney Chambers and Inspector Geordie Keating, respectively—bringing justice and spiritual nourishment to early 1950s

Noni Hazlehurst  
in *A Place to  
Call Home*

England. In the premiere episode of this new season, see why an impossible situation distracts Sidney from his Christmas duties. Then, when a would-be groom is found dead with the wedding rings lodged in his mouth, Geordie is horrified: These are the hallmarks of a years-old unsolved murder.

## **Weddings of Downton Abbey**

**Sunday, June 4 at 9 p.m.**

The romantic relationships at Downton riveted viewers as they followed the twists and turns of some of the most beloved – and dramatic – courtships in television history. Hosted by Hugh Bonneville, this celebration features the most romantic and moving wedding scenes from the series as well as exclusive interviews with Julian Fellowes, Gareth Neame and Liz Trubridge, and in-depth interviews with cast members who portrayed the romantic partners. **The program encores on Saturday, June 10 at 7 p.m. and Sunday, June 11 at 5 p.m.**

# The American Epic Sessions

**Tuesday, June 6 at 8 p.m.**

The American Epic team has reassembled the very first electrical sound recording system from the 1920s, and invited Jack White and T Bone Burnett to produce an album of recordings by twenty of today's greatest artists, including Willie Nelson, Merle Haggard, Elton John, Nas, Taj Mahal, Alabama Shakes, Beck and Los Lobos. Witness the historic recording session as they recreate America's musical past. In this beautifully filmed musical feature, these artists are given the chance to pass through the portal that brought the world into the modern era.

Engineer Nicholas Bergh has reassembled this recording system from original parts and is now the only one left in the world. The system consists of a single microphone, a towering six-foot amplifier rack, and a live record-cutting lathe, powered by a weight-driven pulley system of clockwork gears. The musicians have roughly three minutes to record their song directly to disc before the weight hits the floor. In the 1920s, they called this "catching lightning in a bottle." All the musical performances in this film are live.

**“Bergh has reassembled this recording system from original parts and is now the only one left in the world.”**

## A Message from the Desert Meadows AHEC Coordinator

# Improving Community Health

**A**s part of our mission to use television and other technology to educate individuals and strengthen partner organizations, Vegas PBS works to educate health care professionals and the Southern Nevada community through our Desert Meadows Area Health Education Center (Desert Meadows AHEC). As a grant-funded service of Vegas PBS, Desert Meadows AHEC is part of a US Department of Health and Human Services funded network of programs to enhance access to quality healthcare, particularly primary and preventative care, by increasing the number of healthcare professionals serving local communities.

Following the same model we use with our educational and workforce initiatives, Desert Meadows AHEC serves as a local outreach and community impact extension of our health-care-related broadcast programming. We serve more than 8,000 people each year with outreach focused on three main goals: 1) exciting middle and high school students about health-care careers in Southern Nevada, 2) providing continuing education courses for healthcare professionals, and 3) connecting the community to better health through broadcast programs and workshops.

Southern Nevada has a critical shortage of physicians. Through Desert Meadows AHEC, the station takes the time to visit schools and pique student interest in healthcare through several programs. Desert Meadows AHEC works with 22 schools in Clark, Lincoln and Nye counties to provide the Teen Education and Career in Healthcare (TEACH) program, partners with Nevada State College for the RN Bound – Nurse Camp, teams up with College of Southern Nevada for a College Engagement Series and our most recent program, CampMED.

Last summer, in partnership with UNR and UNLV Schools of Medicine, Touro and Roseman Universities, Nevada State College, College of Southern Nevada and Western Governors University, 49 eighth graders attended CampMED, a mock residency program introducing them to the clinical medicine fields with workshops involving research and clinical problem-solving. Campers gained hands-on experience in how doctors talk with patients, how to study the clues of a patient's illness through library research, and how to solve a case by using critical thinking skills in addition to laboratory techniques. At the end of CampMED, each cohort group presented during "grand rounds" to present their findings. At the conclusion of camp, each student was presented a BMd certificate (Beginning Medical Doctor). Because of its success, we are welcoming a new batch of residents to experience CampMED this month.

We've also had the opportunity to partner with health experts and host public panels in conjunction with health-related programs, such as **The Brain with David Eagleman** and **Alzheimer's: Every Minute Counts**. This month, we're continuing the healthcare conversation on Vegas PBS Channel 10 by airing these broadcast programs: **Alzheimer's: Every Minute Counts**, **The Answer to Cancer Might Be Walking Beside Us** and **FRONTLINE: Supplements and Safety**.

## Children's Lineup

### Our New Summer Lineup Debuts!

Can it be summer already? School is out, but that doesn't mean the learning has to stop. Our terrific lineup of children's programs help the kids continue with their reading, math and problem solving skills while having fun at the same time! The VEGAS PBS KIDS summer schedule kicks off on Monday, June 5, with new times for many of the programs. Be sure to check the listings so your children don't miss any of their favorite shows.

### Nature Cat: Ocean Commotion

**Monday, June 19 at 8 a.m.**

Fred is a house cat who dreams of exploring the great outdoors. Once his family leaves for the day, Fred transforms into Nature Cat, "backyard explorer extraordinaire." He embarks on action-packed adventures that include exciting missions full of nature investigation with his friends, Hal the Dog, Daisy the Bunny and Squeeks the Mouse.

In this new hour-long adventure, Nature Cat has made a terrible mistake! He accidentally dropped Hal's favorite toy, Mr. Chewinsky, down the storm drain, and now he is floating on the storm water, working his way through the drain system to the river and out to the ocean! Oh no! As the gang goes to find and save Mr. Chewinsky, they learn how all waterways are connected, and also meet up with a new special friend named Nature Dog, who helps them navigate the oceans. Will they find Mr. Chewinsky? Will Hal be able to celebrate his anniversary? And who is Nature Dog?! **Repeats Wednesday, June 21 and Friday, June 23 at 8 a.m. and also airs the same days at 2:30 p.m.**

## THIS WEEK'S PICKS

### Outdoor Nevada Special

Wednesday, June 7 at 7:30 p.m.

Join John Burke and Vegas PBS to celebrate local programming and revisit some of our favorite stories from Season 2 of **Outdoor Nevada**. In this special, we discover the twists and turns of Cathedral Gorge State Park, the secret jewel of Nevada State Parks. We step back in time at the McGill Drugstore near Ely, and we investigate some bullet holes on the walls of the legendary Pioneer Saloon in Goodsprings. Then, we take in the scenery of Red Rock Canyon on horseback and stick around for an amazing cowboy dinner. Tune in on Wednesday, June 7 at 7:30 p.m. to see host John Burke in our Vegas PBS studio and relive some of our adventures on the show. *Repeats on Saturday, June 10 at 4 p.m. and Sunday, June 11 at 8:30 a.m.*

Host John Burke takes in the 500,000-acre view at the Sheldon National Wildlife Refuge

### The 60s Generation (My Music)

Monday, June 5 at 9 p.m.

This treasure-trove of essential folk-rock, rhythm-and-blues and pop classics bring back an era that defined a generation. Leading off the celebration of the peace and protest decade are the New Rascals, who perform their chart-topping pair of blue-eyed soul smashes “People Got to Be Free” and “Groovin’.” We Five of the folk music craze reunite to sing “You Were on My Mind,” and the Association reunites with their two million-selling standards, “Cherish” and “Never My Love.” The 60s psychedelic sounds are represented by Vanilla Fudge’s “You Keep Me Hangin’ On” and the infamous “In-a-Gadda-Da-Vidda” by metal pioneers Iron Butterfly. With introductions by “Mama” Michelle Phillips of the Mamas & the Papas, this special remembers and rejoices in an unforgettable time of profound change and music that remains relevant today.

## THIS WEEK'S PICKS

### NOVA: Why Sharks Attack

Wednesday, June 14 at 9 p.m.

In recent years, an unusual spate of deadly shark attacks has gripped Australia, resulting in five deaths in ten months. At the same time, great white sharks have begun appearing in growing numbers off the beaches of Cape Cod, Massachusetts, not far from the waters where Steven Spielberg filmed *Jaws*. What's behind the mysterious arrival of this apex predator in an area where it's rarely been seen for hundreds of years? Are deadly encounters with tourists inevitable? To separate fact from fear, **NOVA** teams with leading shark experts in Australia and the United States to uncover the science behind the great white's hunting instincts. With shark populations plummeting, scientists race to unlock the secrets of these powerful creatures of the deep in their quest to save people — and sharks.

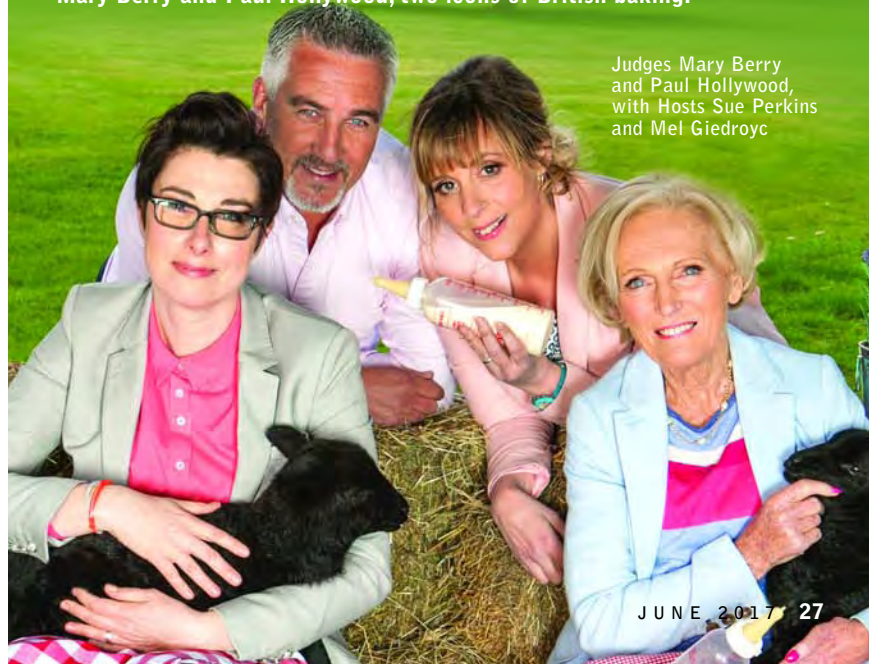

Great White shark.

### Great British Baking Show

Fridays at 9 p.m. beginning June 16, with a bonus episode June 16 at 10 p.m.

This food show phenomenon in the U.S. and abroad, returns for an all-new delicious fourth season. Known as much for its perfect “scrummy” pastries as for its “soggy bottom” failures, the baking competition follows amateur bakers from diverse backgrounds who tackle culinary trials that increase in difficulty as the competition unfolds. In each episode, challenges come in three categories: a Signature Bake, to test the contestants' creative flair and baking ability; a Technical Bake, in which challengers receive basic recipes with ingredient lists and minimal instruction; and the Showstopper Bake, designed to display depth of skill and talent. As in past seasons, contestants will be judged by Mary Berry and Paul Hollywood, two icons of British baking.

Judges Mary Berry and Paul Hollywood, with Hosts Sue Perkins and Mel Giedroyc

## THIS WEEK'S PICKS

### Nazi Mega Weapons: Hitler's Island Megafortress

Thursday, June 22 at 10 p.m.

In June 1940, the Nazis set foot on British soil. The Channel Islands, a British territory since the 11th century, is now under German rule. Hitler becomes obsessed with holding onto this small corner of Britain and demands the construct of a network of extraordinary fortifications across the island, using interconnected bunkers, gun emplacements, observation towers, strongpoints and tunnels that could withstand attack from the sea or air. In his bid to hold on to the territory, the islands become one of the most heavily fortified pieces of land in the whole of Europe.

### Landmarks Live in Concert: A Great Performances Special

Friday, June 23 at 10 p.m.

Chad Smith, the drummer for the Red Hot Chili Peppers, serves as host for this innovative series and conducts one-on-one interviews with the artists exploring their favorite locations around each "landmark." The show is being shot in locations around the world, with major artists performing shows for their fans in front of landmarks to which they have a connection and shows how the particular cities influenced the artists' careers and shaped their music. This week's guest is will.i.am, the multi-faceted entertainer and creative innovator, and a seven-time Grammy Award winner. And don't miss next week's episode featuring the legendary tenor Andrea Bocelli.

## THIS WEEK'S PICKS

### Antiques Roadshow: Vintage Hot Springs Monday, June 26 at 8 p.m.

This long-running series captures tales of family heirlooms, yard sale bargains and long-lost items salvaged from attics and basements, while experts reveal the fascinating truths about these finds. It has been 14 years since the program made a stop in Hot Springs, Arkansas. Travel back with us to see our take on treasures then and now. Have any of the appraised items decreased in value?

### Prime Suspect: Tennison on Masterpiece Sunday, June 25 at 10 p.m.

Stefanie Martini  
and Sam Reid

Behind every great detective is a backstory. This three-part series dials back the clock to spotlight the influences that turned 22-year-old rookie policewoman Jane Tennison into a savvy, single-minded crime fighter. The series stars Stefanie Martini (*Doctor Thorne*) and Alun Armstrong (*Little Dorrit*) as crime family kingpin Clifford Bentley. Tied to murder, gambling, narcotics and prostitution, the Bentleys and their underworld rivals give Jane a crash course in the gritty realities of police work. Set in 1973, the story opens with Jane, a newly minted constable, performing her probationary stint at Hackney Police Station in East London. Relegated to traffic incidents, dispatching, and other routine police chores amid a sexist culture of the force, she gets her big break when a murder case of a young girl calls for an all-hands-on-deck investigation. So commences Jane's real education.

# Africa's Great Civilizations

Sunday, June 11 from 9:30 a.m. to 5 p.m.

Airing back-to-back episodes, this fascinating six-hour documentary series is hosted and written by Emmy Award-winning Harvard scholar Henry Louis Gates, Jr. Professor Gates presents a new vision not only of Africa's pivotal place in world history, but also the world's relation to Africa. Africa is the ancestral home to the human community

and to many of the pivotal breakthroughs in the history of civilization, yet the continent continues to be stereotyped as an isolated and underdeveloped region in the mind of outsiders, devoid of any profound historical achievements. The series dispels these myths and other inaccuracies about Africa through a detailed and riveting examination of signifi-

cant historical events, such as the rise of its powerful kingdoms, the growth of extensive trade networks with the Middle East, Europe and China, seminal technological and artistic discoveries, and its peoples' resilience in the face of harrowing past traumas.

# The Crowd & The Cloud

Sunday, June 25 from 1 p.m. to 5 p.m.

Are you interested in birds, fish, the oceans or streams in your community? Are you concerned about fracking, air quality, Alzheimer's disease, Zika or other epidemics? Now you can do more than read about these issues. You can be part of the solution. Smartphones, computers and mobile technology are enabling regular citi-

zens to become part of a 21st century way of doing science. By observing their environments, monitoring neighborhoods, collecting information about the world and the things they care about, so-called "citizen scientists" are helping professional scientists to advance knowledge while speeding up new discoveries and innovations. Each episode takes you on a

### Fresh Quilting

**Mondays and Fridays beginning  
June 30 at 6 a.m.**

Are you looking for inspiration in making your own beautiful quilts? Then join us in this brand new series with an all-star lineup of modern designers and quilters. These innovative modern quilters reinterpret traditional techniques with a fresh, modern aesthetic. In each episode, leading designers share quilting techniques to create high-impact quilts. You will learn design concepts and techniques, along with sewing tips that you can use to create your own compelling modern quilt designs. *Repeats same days at noon.*

JACKPOT! SPOTLIGHT

## Great Performances at the Met: Rusalka

Thursday, June 22 at 9 p.m.

Kristine Opolais “gives a vocally lustrous and achingly vulnerable performance” (New York Times) in the role that helped launch her international career, the mythical Rusalka, who sings the plaintive “Song to the Moon.” In this haunting production, the water nymph Rusalka has fallen in love with a human—the Prince—when he came to swim in her lake. Now she wants to become human herself and live on land to be with him. Director Mary Zimmerman brings her wondrous theatrical imagination to Dvorák’s fairytale of love and longing, rejection and redemption, giving the work “an inspired staging” (Huffington Post).

## Lampedusa

Sundays, June 4 and 11 at 7 p.m.

For thousands of souls arriving from Africa, the Middle East and Asia, their first point of European contact is Italy’s southernmost island, Lampedusa. People who live in safety can hardly imagine their harrowing journeys, and the two-part mini-series depicts the cruelty of traffickers who manage the hellish trips across the Mediterranean. This timely special focuses mainly on the relationships forged by those who rescue and work with the refugees. Maverick Coast Guard Commander Serra will buck orders if they impede his mission of rescuing refugees coming to Italy across the Mediterranean. He may disregard the brass, but he has tremendous respect for his colleagues and the brave souls fleeing war and political unrest. In Italian with English subtitles. **Repeats same days at 10 p.m.**

## Rikers: An American Jail

Wednesday, June 7 at 9 p.m.

Of the more than 7,500 people detained at Rikers Island on any given day, almost 80% have not yet been found guilty or innocent of the charges they face. All are at risk in the pervasive culture of violence that forces people to come to terms with what they must do for their own survival. This riveting new documentary from Bill Moyers brings you face to face with men and women who have endured incarceration at Rikers Island. Their stories, told direct to camera, vividly describe the cruel arc of the Rikers experience—from the shock of entry, to the extortion and control exercised by other inmates, the oppressive interaction with corrections officers, the beatings and stabbings, the torture of solitary confinement and the many challenges of returning to the outside world.

## Why We Support Vegas PBS...

Storytelling is a vital part of our experience. We share our humanity when we learn about people, cultures, and ideas that are different than our own. Vegas PBS and the Utah Shakespeare Festival tell stories that are important to all of us and help us all better understand each other and the world around us. From the stories of Masterpiece to incredible ideas on NOVA, Vegas PBS is a consistent source of programming that helps each of us better understand what it is to be human.
