## A Message from the General Manager

### From Sputnik to the Solar Eclipse

Sixty years ago, the Soviet Union launched the world's first artificial satellite, ushering in a new era of scientific discovery. Sputnik I was an impressive technological advancement that also triggered anxiety and fear over a perceived technology gap between the United States and the Soviet Union.

In response, President Eisenhower convinced Congress to pass the National Defense Education Act (NDEA) less than one year later, providing the funding that fueled the space race and eventually landed the first human on the moon. The NDEA also included funding to increase science and technology education, foreign language, and world history and culture courses as a vital component of our national security and economic competitiveness. The act provided the first federal funding for the use of educational television as an instructional medium.

A decade later, in September 1968, Vegas PBS partnered with the Clark County School District's Vocational Technical High School to produce and broadcast six hours a day of live instruction in math, science and foreign languages. The national and local educational television courses were a success, and led to the public-private partnership we now call public television.

Now in its 44th season, **NOVA** is the most-watched primetime science series on American television. This month, **NOVA** will capture the extraordinary total solar eclipse over North America. On Monday, August 21, Southern Nevada will be able to watch a partial solar eclipse during the morning hours, but can experience the complete cosmic event in **NOVA: Eclipse Over America** at 9 p.m. on Vegas PBS Channel 10. **NOVA** will incorporate immersive CGI animation and integrate stunning sequences of the eclipse itself from iconic locations along its path.

Also in August, viewers can travel to some of the planet's most remote locations in **Flying to the Ends of the Earth**, follow the Rosetta spacecraft as it attempts to land on a comet in **To Catch a Comet**, retrace NASA's epic Voyager missions in **The Farthest Voyager in Space**, and follow an astronaut's life from pre-training to life on board the space station in **How to Build an Astronaut**. We hope you'll enjoy the tremendous science exploration programs on Vegas PBS throughout the month.

Eisenhower desired a universally accessible service that stimulated young people to study science, math and technology and helped Americans understand the complex world cultures we would encounter through both trade and competition. To a degree he never imagined, PBS programming fulfills his vision for a great nation that has effective national security, continuing technological advancement and cultural understanding. We thank you for your generous financial support that ensures public television is available to everyone in Southern Nevada and educational television is in every classroom.

# NOVA: Eclipse Over America

Monday, August 21 at 9 p.m.

On August 21, 2017, people across the United States will see the sun disappear behind the moon, turning daylight into twilight, causing the temperature to drop rapidly and revealing massive streamers of light streaking through the sky around the silhouette of the moon. On that day, America will fall under the path of a total solar eclipse, the first in the United States since 1979. **NOVA** will capture the spectacular event in a special presentation to air hours after it takes place. This extraordinary cosmic spectacle will pass through 13 states, and everyone in the continental U.S. will have the opportunity to see at least a partial eclipse, making it the most widely viewable eclipse of all time. Commencing at 10:15 a.m. PDT, a lunar shadow 73 miles wide will take one hour and 33 minutes to travel from Oregon on the west coast to South Carolina on the east, allowing continuous observation for 90 minutes.

**“...everyone in the continental U.S. will have the opportunity to see at least a partial eclipse...”**

**NOVA's** fastest turnaround film to date, the program will follow teams working on the forefront of solar science and solar storm detection, use immersive CGI animation to reveal the sun's secret mechanisms and integrate stunning sequences of the eclipse itself — including scenes filmed at iconic locations along the path of the eclipse — user-generated content, NASA footage and more. Don't miss this ultimate companion to a spectacular celestial event. *Repeats Wednesday, August 23 at 8 p.m. and Sunday, August 27 at 9 a.m.*

Since man first looked up into the sky, seeing a man in the moon and giving names and stories to the constellations, space has held a long fascination for us. This month we have a spectacular lineup of specials that explore the history of our quest into space and the people who have taken us there.

## **Flying to the Ends of the Earth:**

**Monday, August 14 and Thursdays, August 17-24 at 10 p.m.**

Former Royal Marine Arthur Williams did not let the car crash that left him paralyzed deter his passion for flying and world travel. Despite his physical limitations, Williams uses a small prop plane to demonstrate how tiny aircraft are providing access to some of the planet's most remote places. In this fascinating travel series, he travels to Nepal, landing on Everest's steep runway; then onto Papua to a desert island in the Coral Sea; ending in the Great Bear Rainforest of Canada.

## **To Catch a Comet**

**Monday, August 21 at 10 p.m.**

This compelling documentary details the complexities and challenges of the ten-year, four-million-mile journey of the European Space Agency's (ESA) Spacecraft Rosetta as it chased down and landed on the Comet 67P/Churyumov-Gerasimenko in a history-making feat. Follow the international team of scientists and engineers who guide Rosetta through the last year of its ten-year trajectory across the universe: around the Earth, around Mars and twice through the asteroid belt to reach its destination. Discover the complete backstory of the ten-year Rosetta mission from inception, intergalactic near-misses, and to its eventual touchdown.

## **The Farthest Voyager in Space**

**Wednesday, August 23 at 9 p.m.**

This two-hour special chronicles NASA's historic Voyager mission to explore our solar system and beyond. With participation from more than twenty of the original and current mission scientists, engineers and team members, the special shares captivating tales of one of humanity's greatest achievements in exploration. From supermarket aluminum foil added at the last minute to protect the craft from radiation; to the near disasters at launch; to the emergency maneu-

**Repeats Sunday, August 27 at 10 a.m.**

## **How to Build an Astronaut**

**Sunday, August 27 at noon**

This special follows Major Tim Peake's grueling training to become Britain's first astronaut on the International Space Station. Meet the engineers, physicists and mechanics who design and build the technology that will take Tim to the ISS, and the medics and psychologists who will monitor his well-being once he's there. Featuring Tim's own video diary, the program offers a unique picture of an astronaut's life, from what it takes to become physically and mentally prepared for the journey and through his life and work once he is on board the International Space Station. **Repeats Monday, August 28 at 10 p.m.**

## **Cosmonauts**

**Sunday, August 27 at 1 p.m.**

On July 1969, Neil Armstrong made one giant leap for mankind and America went down in popular

history as the winner of the space race. But the real space pioneers of the 20th century were the Soviets. Between 1961 and 1966, they realized a number of spectacular historical achievements and seemed unstoppable. Then a string of misfortunes struck, allowing the Americans to streak ahead and ultimately claim victory. But the Russians recalibrated their space program in the 1970s, achieving more success and coming in many ways to dominate modern space exploration. With archive and compelling interviews, the program reveals the story of the space race from the other side of the iron curtain.

## A Message from the Director of Educational Media Services

**Dr. Niki Bates**  
Director of  
Educational  
Media Services

## Committed to Education

**E**ducation is at the center of the PBS experience, inspiring and educating viewers of all ages. Beyond our television programs, Vegas PBS puts this value into practice by providing quality educational resources for educators, parents, and children. Through its educational media services, Vegas PBS serves to provide trusted, valued and essential services to extend and amplify learning through a myriad of offerings.

The Vegas PBS special needs resource library (Described and Captioned Media Center) is one such service that delivers a powerful means of support for those with special needs, their families and service providers. A grant-funded library, originally developed to provide descriptive video for the blind and closed captioning for the deaf, has grown to address a multitude of special needs such as down syndrome, autism, language delay, anger management, motor skills development, and more. This free-loan library is available throughout the state of Nevada and maintains partnerships with more than 40 entities throughout the community to ensure that the most up-to-date and essential resources are available. With more than 25,000 pieces of educational media circulated during the last year and more than 1,300 visits to the library, this library has proven to be a vital resource. The library is seen by appointment only. To schedule a visit, please call 702.799.1010 x5419. A bi-lingual, customer friendly staff awaits you.

Vegas PBS' *Ready To Learn* program is another excellent example of service to our community through approximately 900 educational workshops and community events. This educational program utilizes well-known PBS KIDS programming and characters to extend literacy, math, health, science, and technology learning, making anytime learning time. Within the last year, more than 86,000 grant-funded books have been distributed to families throughout the community to ensure that the learning continues at home.

Mobile apps, digital games, and online resources are also available for free and can be accessed at [VegasPBS.org/kids-families](http://VegasPBS.org/kids-families). Recently, the Vegas PBS *Ready To Learn* program also partnered with the Las Vegas-Clark County Library District and the United Way of Southern Nevada to provide a free Daniel Tiger Be My Neighbor Day extravaganza. More than 300 families with 500 children participated in several fun and engaging activities, imparting the Daniel Tiger values of kindness, caring, empathy, and community.

Additionally, Vegas PBS maintains a vast educational video/digital library for teachers and students. One of the databases, PBS LearningMedia, is available for public use and can be accessed at [Vegas.PBSLearningMedia.org](http://Vegas.PBSLearningMedia.org). This digital library draws from a rich history of PBS programming offering more than 100,000 videos, images, interactives, lesson plans and articles in major subject areas. Optimizing learning for all ages, wherever learning is happening, by providing high-quality educational resources adds significant value to our community.

Hanging like an emerald jewel off the western edge of Europe, Ireland has always been a place apart – the last scrap of rock before the void of the Atlantic Ocean. ## THIS WEEK'S PICKS

### Rock, Rhythm and Doo Wop (My Music)

Sunday, August 6 at 10 p.m.

A simple song can transport anyone back in time. The lyrical and electric sounds of rock, rhythm and doo wop do this better than almost any other genre. This musical event is as close to time travel as television allows, featuring a historical reunion of music icons Little

Guest stars gather for a performance

Richard, Frankie Valli, Little Anthony & The Imperials, Fred Parrish & The Five Satins, Lou Christie and Lenny Welch. Hosted by Frankie Valli, Jerry Butler and Lloyd Price, the concert features a surprise appearance by Little Richard, who burns up the stage with an exhilarating performance of "Keep A-Knockin'." The special evokes images of slow-dancing with a steady in the still of the night, crying to an "ex" that he don't love you like I love you or dreaming of happily-ever-after since I fell for you.

### PBS Previews: Vietnam

Tuesday, August 8 at 8 p.m.

Mary Ann Vecchio kneels over the body of fellow student Jeffrey Miller, Kent State University, 1970

This new 10 part, 18-hour documentary film series from acclaimed filmmakers Ken Burns and Lynn Novick is coming to PBS September 17! In an immersive 360-degree narrative, the epic story of the Vietnam War features testimony from nearly 100 witnesses including many Americans who fought in the war and others who opposed it, as well as Vietnamese combatants and civilians from both the winning and losing sides. This program takes a look at creation of the upcoming series featuring interviews with the filmmakers, behind-the-scenes footage and exclusive clips from the series, providing an advance look at this fall's most anticipated film.

## THIS WEEK'S PICKS

### India - Nature's Wonderland

**Wednesday, August 16 at 8 p.m. and 9 p.m.**

How does a country with a population of more than a billion people still have room for such a huge range of wildlife? Wildlife expert Liz Bonnin has had a passion for India from the moment she first set foot there. Actor Freida Pinto (*Slumdog Millionaire*) grew up there and understands the deep bond between Indians and their natural world. Mountaineer Jon Gupta has climbed throughout the Himalayas and summited Everest, but he's never climbed in India. All three share a common bond: Their families come from India; this land is in their blood. Now they want to share India's natural wonders. This is India as you've never seen it before. *Repeats on Sunday, August 20 at 9 a.m.*

### Endeavour Series 3 on Masterpiece: Coda

**Sunday, August 13 at 8 p.m.**

Season 3 finds the young Endeavour Morse (Shaun Evans) dealing with the aftermath of the events that left him in prison and his senior officer, DI Thursday (Roger Allam), with a life-threatening injury. In this final episode of the series, Endeavour is occupied with unexpected strife in his personal life. Recruited by a college mentor to monitor the movements of his estranged younger wife, Endeavour finds himself drawn to the woman he is investigating. The grisly murder of a man who works in fashion causes a shakeup in Oxford's criminal underworld. Meanwhile, Endeavour considers his future on the force, leading to an agonizing conclusion to the series.

## THIS WEEK'S PICKS

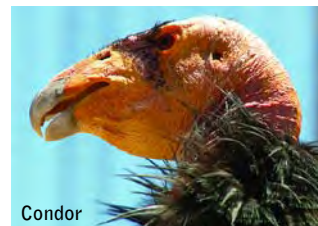

### Condor's Shadow

Thursday, August 24 at 8 p.m.

Witnessing a California condor – and its 9 1/2 foot wingspan – in flight is an extraordinary experience.

Unfortunately, it is also a rare one. Thousands of years before humans arrived in North America, this

ancient bird flew uninhibited over the continent, but centuries of human activity eventually drove their numbers down dramatically – fewer than 30 birds were left by the late 1980s. This special highlights the gargantuan effort of reestablishing the nearly extinct California condor to its natural habitat. Featuring a bold and feisty condor named Pitahsi and dedicated U.S. Fish & Wildlife Service biologist Joseph Brandt, the film is a moving portrayal of an environmental challenge, passionate conservationists and the American bird that might otherwise have disappeared from the landscape.

### Alan Cumming Sings Sappy Songs

Friday, August 25 at 9 p.m.

The Tony and Olivier Award-winning Broadway and television star Alan Cumming's critically-acclaimed touring show was filmed before a live audience at The Smith Center for the Performing Arts in Las Vegas. The star's personal and intimate performance has been likened to "an emotional firestorm." Cummings performs songs that mark poignant moments in his life that were originally written or made famous by artists like Annie Lennox ("Why"), Rufus Wainwright ("Dinner at Eight"), Keane ("Somewhere Only We Know"), Billy Joel ("Goodnight Saigon") and a medley of hits by Adele, Lady Gaga, Katy Perry titled "Someone like the Edge of Firework" and more. This truly unique star brings an eclectic mix of songs and stories of his interesting life and career to the stage.

## THIS WEEK'S PICKS

### Richard Linklater: American Masters

Friday, September 1 at 9 p.m.

This documentary explores the life and work of filmmaker, Richard Linklater. A fiercely independent style of filmmaking arose from Austin, Texas in the 1980s/early 90s and the film presents an unconventional look at how Linklater's films of that period, *Slacker*, *Dazed and Confused* and *Before Sunrise*, sparked a low budget, in your own backyard movement in this country and around the world. Throughout the film, Linklater himself addresses his own life at mid-career point, at times appearing embarrassed and shy. He tells of the influential array of filmmakers, playwrights and criminals that continue to form his own work. Interviews include Ethan Hawke, Jack Black, Matthew McConaughey, Jonathan Demme, and Sandra Adair, Julie Delpy, members of the Linklater family, Clark Walker and more.

Local people fishing in Derawasih Bay, Indonesia

### Earth's Natural Wonders Wednesday, August 30 at 8 p.m.

This three-part series visits some of the most extraordinary places on Earth, telling the remarkable stories of people who live there and the extreme challenges they face. Filmed on six continents in twelve languages, the series features stunning photography and daring cinematography. The stories include a young Sherpa who ropes a route across the notorious Khumbu Icefall in time for hundreds of foreign mountaineers who arrive for hunting season, and fishermen near Zambia's Victoria Falls braving crocodiles, elephants and the risk of being swept to certain death to reach exotic and plentiful fishing pools at the Falls' edge. Also, witness a father and son who brave killer bees and man-eating tigers to find prized honey in Bangladesh's Sundarbans, the largest mangrove forest in the world.

### Create Marathon: Melon Goodness Saturday, August 5 from 6 a.m. - noon

It's summertime and we are enjoying the juicy goodness of melons! Melons are a welcome sweet addition to any meal as our Create chefs so aptly demonstrate. Nick Stellino is pairing a Cucumber and Honeydew Chutney with a Rib Eye Steak. Sticking with the meat and melon theme, Sara Moulton grills pork tenderloin with watermelon and cucumber on the side. Pati Jinich makes a refreshing mixed melon drink that's a perfect way to beat the heat. *Repeats same day from 6 p.m. - midnight and on Sunday, August 6 from noon - 6 p.m.*

Nikki and Dusty Green

### Two for the Road Tuesdays and Thursdays beginning August 22 at 11 p.m

This fun and quirky new travel series follows the adventures of Nikki and Dusty Green - a married couple from Texas who in 2007 decided they'd had enough of the rat race. So they quit their jobs, sold their house, their cars and practically all their possessions and set out to live a life of travel! Their adventures in Season one take them on an awe-inspiring journey around the globe — with stops in Alaska, Tanzania, the Ecuadorian Amazon, the Galapagos Islands, Patagonia, China and Antarctica. ### 37REWIND SPOTLIGHT **NOVA: Secrets of the Sky Tombs**

**Friday, August 4 at 10 p.m.**

The towering Himalayas were among the last places on Earth that humanity settled. Scaling sheer cliff sides, a team of daring scientists hunts for clues to how ancient people found their way into this forbidding landscape and adapted to survive the high altitude. They discover rock-cut tombs filled with human bones and enigmatic artifacts, including gold masks and Chinese silk dating back thousands of years, and piece together evidence of strange rituals and beliefs designed to ward off the restless spirits of the dead.

## **The Vienna Philharmonic Summer Night Concert 2017**

**Thursday, August 24 at 9 p.m.**

Led for the second time by German pianist and conductor Christoph Eschenbach, the world-renowned Vienna Philharmonic returns for its 14th open-air concert in Austria's Imperial Schönbrunn Palace Gardens. Fairy tales, myths, legends and sagas are closely entwined with many composers and compositions. They have served as inspiration, models and sources for many musical works, several of which have been selected for this concert. The concert soloist is renowned soprano Renée Fleming who performs two arias from operas by Antonin Dvorák: the famous "Song to the Moon" of the water nymph Rusalka and the aria of the sorceress Armida from the operas of those names, as well as three songs by Sergei Rachmaninoff: "Twilight," "Sing Not to Me, Beautiful Maiden" and "Spring Waters."

## **Mary Higgins Clark Mysteries**

**Tuesdays, August 15-29 at 7 p.m.**

Mary Higgins Clark is the Queen of Suspense, with over 3.7 million books sold worldwide. Now, the acclaimed novelist is reinvented in a new series of three French movies based on her most popular mysteries, with thrilling plots, gorgeous scenery and nerve-shattering suspense. In "Two Little Girls in Blue," Julie and Simon Malherbe are horrified to discover that their six-month-old twin girls have been kidnapped. "Where Are You Now?" begins with Olivia Delmas receiving a birthday message from her son, Mathieu—as she has every year since his disappearance a decade prior. Then in "Daddy's Little Girl," 16-year-old Pauline was found murdered in the barn where she used to rendezvous with her secret boyfriend, Raphael. Also, keep your eye out for fun cameo appearances by the author and her books in each of the movies! **Repeats same days at 10 p.m.**
